

NEUROSCIENCE (NEUR)

NEUR 18000: WKSP: 1 Hour(s)

WORKSHOP ~ Workshops may be taken Pass/No Credit only. Students may take no more than nine workshops for credit toward graduation. Workshops can be used as elective credit only.

NEUR 22700: INTRO TO NEUROSCIENCE: 4 Hour(s)

INTRODUCTION TO NEUROSCIENCE ~ Introduction to neuroscience is a laboratory-based course designed to orient students to the many approaches to neuroscience. In addition to covering the development, evolution, anatomy, and physiology of the nervous system, students will learn about cell and molecular, cognitive and behavioral, computational, and philosophical approaches to the study of the brain. The lecture component of the course emphasizes finding, using, and criticizing primary sources in each domain of neuroscience. The lab component comprises two major original research projects designed, carried out, summarized, and presented by students based on topics that interest them in the lecture component. Students must register for a NEUR 22700 lab. Also listed as BIOL 22700. CHEM 12000 is not mandatory, you may ASK instructor for permission. PSYC 10100 is mandatory. Prerequisite: CHEM 12000 or PSYC 10100

NEUR 28000: SEM:: 1-4 Hour(s)

SEMINAR ~

NEUR 28100: INDEPENDENT STUDY: 1-4 Hour(s)

INDEPENDENT STUDY ~

NEUR 29800: FIELD EXPERIENCE: 1-4 Hour(s)

FIELD EXPERIENCE ~

NEUR 33000: CELLULAR & MOLECULAR NEUROBIO: 4 Hour(s)

CELLULAR AND MOLECULAR NEUROBIOLOGY ~ This course is a study of the microscopic parts of the nervous system: the molecular, cellular and developmental aspects of what is arguably the most complex biological system ever studied. We will cover the basic plan of the nervous system, the cellular components of the nervous system (neurons and glia), the electrical properties of neurons, neurotransmitters and synaptic transmission. We will also study the embryonic development of the nervous system, including neurogenesis, axonal pathfinding, neuronal cell death and synapse elimination. In addition, we will discuss primary scientific papers describing fundamental breakthroughs in cellular and molecular neuroscience. Also listed as BIOL 33000.

Prerequisite: BIOL 23000 or NEUR 22700

NEUR 38000: SEM:: 4 Hour(s)

SEMINAR ~

NEUR 38100: SPC TPC:: 1-4 Hour(s)

SPECIAL TOPICS ~

NEUR 48000: NEUROSCIENCE CAPSTONE: 1-4 Hour(s)

NEUROSCIENCE CAPSTONE ~ Students in this course will design and execute original research related to the discipline of neuroscience. The student must submit a project proposal to his or her neuroscience faculty advisor outlining the research problem, the methods to be used and anticipated results prior to beginning the project. The student will submit a final report to the sponsoring faculty member and a public presentation. Prerequisites: Senior standing and permission.

NEUR 48100: INDEPENDENT RESEARCH: 1-4 Hour(s)

INDEPENDENT RESEARCH ~

NEUR 49800: INTERNSHIP: 4 Hour(s)

INTERNSHIP ~
