

ACCOUNTING AND FINANCIAL MANAGEMENT

Program Website: Accounting and Financial Management – Hiram College (<https://www.hiram.edu/academics/undergraduate-studies/undergraduate-programs/accounting-and-financial-management/>)

Introduction

Explore the popular, career-focused accounting and financial management major, which prepares you to become an ethically grounded and socially responsible financial professional.

A successful accounting career requires more than technical knowledge; it calls for well-rounded accounting and finance expertise rooted in a commitment to making a difference. Hiram's accounting and financial management majors are inquisitive and eager to develop analytical skills. They are leaders on campus, often involved in student body organizations and athletics. By the time they graduate, they're prepared to pursue multifaceted, high-achieving careers.

The accounting curriculum, embedded in the liberal arts, focuses on developing students' analytical, critical thinking and communication skills and emphasizes the integration of theory and its practical application. You will be strongly encouraged to extend your learning beyond the classroom setting through:

- course projects simulating real-world experiences
- internships
- study abroad programs.

Excellent written and verbal communication skills lead to success in the field, so you will experience a concentration on writing in all your courses. This emphasis prepares you with both the technical and analytical skills employers value in the workplace.

As an accounting major, you are encouraged to pursue your interests outside of accounting and finance. For example, past students have paired their study of accounting with physics, theatre, computer science, and entrepreneurship.

This major is available fully online.

Course Descriptions

ACCT 10100: ACCOUNTING & BUSINESS BASICS: 1 Hour(s)

ACCOUNTING AND BUSINESS BASICS ~ Whether as a consumer, potential investor, or employee, most students will be exposed to the "business world" at some point in their career. This course will introduce students to the different forms of business an organization can take on as well as the accountant's role within those organizations. Students will also learn the very basics of how to account for business transactions as well as how to read and interpret an organization's financial statements. This course is intended for students who are NOT majoring in accounting & financial management or management. Students majoring in accounting & financial management or management should enroll in ACCT 22500.
